ASHRAE is an international organization dedicated to advancing heating, ventilation, air conditioning, and refrigeration (HVAC&R) to serve humanity and promote a sustainable world. Founded in 1894, ASHRAE has grown to include over 50,000 members worldwide. One of the key resources provided by ASHRAE is its series of Handbooks, which have become the industry standard for control of built environments. These volumes are updated every four years and cover various aspects of HVAC&R, including Systems and Equipment, HVAC Applications, Refrigeration, and Fundamentals. In addition to publishing design guidance for engineers, architects, and facility managers, ASHRAE also publishes a range of texts for classroom use. Some of the topics covered in these publications include Energy Modeling and Auditing, High Performance Building Design, Psychrometrics, Indoor Air Quality and Environmental Quality, Data Center Energy Efficiency, Noise & Vibration Control, Humidity Control, and HVAC for Healthcare Facilities. The 2013 ASHRAE Handbook: Fundamentals is a comprehensive volume that covers the basic principles and data used in the HVAC&R industry. With over 1,000 pages of content and 39 chapters, this handbook includes information on general engineering topics, materials, climate data, load and energy calculations, duct and pipe design, sustainability, and more. This publication, part of the "Information Series," was released in 2013. It's a detailed guide, consisting of 1,000 pages within its main file and a total of 1,134 pages when including supplementary content. The text is written in English and has two identifiers: 1936504472 and 9781936504473. As for its size, the original file weighs approximately 122 megabytes (MB) and uses the "pdf" extension. This guide falls under various categories, including home improvement and design, as well as heating, ventilation, and air conditioning systems.
